

Supplementary Figure 4: Rarefaction curves for the four primer pairs tested in this study, 68f/518r, 341f/785r, 799f/1193r, and 967f/1391r. Graphs show the rarefied Shannon diversity (a) and Inverse Simpson diversity (b) for each primer pair based on pyrosequencing of the bulk soil and *Acer pseudoplatanus* rhizosphere soil samples collected from a military forest, Zwijndrecht, Belgium.
